

Advancing your life science projects at every step

Eurogentec provides high-quality reagents for both proteomic and genomic applications. The company is known for its flexible and comprehensive valuable services related to the production and development of custom kits and reagents for research use. Eurogentec has a decades-long experience in the field. This guarantees products that best suit your needs.

Oligos

- > Custom oligonucleotides
- > NGS oligonucleotides
- > RNAi oligonucleotides
- > Aptamer oligonucleotides
- > Real-Time qPCR probes
- > Highly complex oligonucleotides
- > Catalogue oligonucleotides
- > Oligonucleotides for *in vivo* research
- > Synthesis reagents

PCR/qPCR

- > Ready to use Takyon® qPCR MMx
- > RT Stable lyophilised Takyon® qPCR & qRT-PCR MMx
- > Takyon® qPCR Core kits for adjustable setups
- > qPCR Controls
- > PCR Mixes and consumables
- > Plastics

Antibodies

- > Custom monoclonal antibodies
 - Mouse hybridoma development
 - *In vitro* mAb production in bioreactors, roller bottles or CL1000
- > Custom polyclonal antibodies
 - Proprietary Speedy 28-Day programmes
 - Generation of anti-PTM antibodies
- > Custom Ab fragments including V_HH from Llama & Alpaca
- > Antibody purification, labelling and testing

Peptides

- > Custom peptides
- > Quantified peptides
- > Heavy isotope labelled peptides
- > FRET peptides
- > Cyclic peptides
- > Peptide-oligo conjugates
- > Catalogue peptides

Genes

- > DNA Purification kits
- > DNA Extraction kits
- > Electrophoresis devices
- > Molecular Weight ladders
- > Agarose

Protein iDentification

- > Recombinant proteins manufacturing
- > Labelling service, kits and reagents
- > iD Sensolyte® Assay kits
